I'm a self-motivated person with more than 10 years of experience focusing my career as a front end developer, working with cross functional teams in agile environments, keeping focus on both personal and team growth, working in close collaboration with business, designers and back end developers.

EXPERIENCE

HCL Mexico, Guadalajara Jalisco

Date: September 2017 to December 2023

Position: Front End Developer.

Our main job was to maintain 3 of our own applications, related to inventory, logistics and the workplace, these applications were developed in react consuming restful api that were in java hibernate.

In relation to the backend, my experience is limited, I have worked with Java superficially, and with Nodejs at a more intermediate level.

- Work on the front end of applications based on business needs.
- Migrations of two projects from javascript to typescript.
- Maintaining a restful api in nodejs
- Working on the migration of several front end projects from openshift to aws
- Working on the migration of several restful api projects from openshift 3 to 4
- Working on the migration of several restful api projects from hibernate to Springboot.
- As far as databases are concerned, I have experience in mysql and postgres.

Technologies:

- Development
 - React (new versions working with the react hooks).
 - Redux toolkit
 - Typescript
 - Nodejs
 - Bootstrap
- ci/cd related
 - Gitlab
 - Pipelines
 - Cypress automation for ui.
 - Postman for restful api
 - qTest

- Agile Related
 - Jira
 - Scrum
- Solo Projects/free time
 - Learning Electronjs
 - Leaning playwright
 - More Node.js for restful api.
 - Leaning next.js

Company: Korsoftocorp.
